Subject Index for Volume 43

(ASHG) = American Society of Human Genetics reports; (CR) = Committee Report; (E) = Editorial; (HGES) = Human Genetics Education Section; (L) = Letter to the Editor; (R) = Review

5-Aminolevulinate synthase, and X-linked sideroblastic anemia, 331
Achondrogenesis-hypochondrogenesis, type II, 894
  Abnormal type II collagen, 904
Acyltransferase, human prebranched chain, mitochondrial import, 764
Adenomatous polyposis, familial, and chromosome 5, 638
Adrenodoxin, human, assignment of functional gene to 11q13→qter, 52
Age at onset, Huntington disease, 695
Alcohol-metabolizing enzymes, genotypes, 744
Aldehyde dehydrogenase, and alcoholic liver disease, 744
Aldehyde dehydrogenase-2 gene, atypical, 741
Allele(s)
  Factor XIIIA*1 and factor XIIIA*2, subtypes, 170
  M2, α1-antitrypsin, 322
  PI Z and M, DNA haplotyping, 978 (L)
Alpha-fetoprotein, maternal, and Down syndrome, 160
α-Globin gene cluster
  Haplotypes, 527
  Hypervariable marker, 249
α-Globin gene haplotypes, 971
α-L-fucosidase gene, structural, 749
α1-Antitrypsin, M2 allele, 322
Alphoid sequences, chromosome-specific, amplification, 69
Amyloidosis, Indiana/Swiss hereditary, 182
Anemia, X-linked sideroblastic, and 5-aminolevulinate synthase, 331
Angiotensin-converting enzyme, 774
Animal models, genetic disease, 582 (R)
Antigens, HLA, in cardiomyopathic chagasics, 770
Apolipoprotein B, variation in quantitative levels, 311
Apolipoprotein C2 gene, 144
Apolipoprotein(s), population distribution of polymorphisms, 847
Ascertainment, conditioning on subsets, 364
Ascertainment sampling, 374
  Pedigrees, 387
ASHG committee and workshop reports
  Genetic discrimination, 105
  Social Issues Committee report, 103
  Proposed position on mapping/sequencing human genome, 101
Auditory brain-stem responses, in fragile X syndrome, 46

B* gene, superactive, and blood group A subtypes, 422
β1 Glycoprotein, human pregnancy-specific, 152
β1-Globin DNA, amplified, dot-blot analysis, 95
β-Thalassemia genes, 95
Blood group A subtypes, and superactive B* gene, 422

Books reviewed, title:
Advances in Neurology, vol. 48: *Molecular Genetics of Neurological and Neuromuscular Diseases*, 220
Biotechnology; An Industry Comes of Age, 570
Catalog of Chromosome Aberrations in Cancer, 786
Cellular and Molecular Basis of Cystic Fibrosis, 983
Endocrine Genes: Analytical Methods, Experimental Approaches and Selected Systems, 548
Eukaryotic Chromosome Replication, 348
Gene Age, The, rev. ed., 570
Genetic Biochemical Disorders, 107
Genetic Markers of Sex Differentiation, 220
Genetic Medicine, 109, 563
Genetics in Medicine, 4th ed., 563
Human Genetics, 4th ed., 566
Human Heredity; Principles and Issues, 568
Man behind the Syndrome, The, 109
Mapping and Sequencing the Human Genome, 785
Mapping Our Genes—The Genome Projects: How Big, How Fast? 785
Medical Genetics—A Legal Frontier, 109
Modern Biological Theories of Aging, 220
Murderous Science, 570
Prenatal Diagnosis of Congenital Anomalies, 786
Primer of Population Genetics, A, 2d ed., 107
Principles of Genetic Toxicology, 108
Protolobar Structure of the Human Kidney: Its Biological and Clinical Significance, 787
Stages of Human Evolution—Human and Cultural Origin, The, 3d ed., 109
Textbook of Human Genetics, 3d ed., 566
Veterinary Genetics, 349

Carrier detection, X-linked hypohidrotic ectodermal dysplasia, 75
Chagasics, cardiomyopathic, HLA antigens, 770
Chiasma number, and crossover positions, nonrandomness, 38
Chlorpyrifos oxon, hydrolysis, 230
Choroid, gyrate atrophy, 922, 929
Chromosome 1
Clinical expression of diabetes mellitus, 217 (L)
Short arm, linkage map, 462
Chromosome 3—specific DNA fragments, localization, 442
Chromosome 5, and familial adenomatous polyposis, 638
Chromosome 6
Enlarged C-bands, alphoid sequence amplification, 69
Major histocompatibility complex of developmental mutants, 115 (R)
Chromosome 7
DNA markers, and cloning of cystic fibrosis gene, 645
Mouse, ornithine aminotransferase structural gene, 922
Chromosome 7q21.3–q22.1, nifedipine oxidase and collagen type 1 alpha, 280
Chromosome 8p, SP-C gene locus, 436
Chromosome 10, ornithine aminotransferase structural gene, 922
Chromosome 11, human insulin/insulin-like growth factor II, 495
Chromosome 11q13→qter, assignment of human adrenodoxin functional gene, 52
Chromosome 13q14-q21, Wilson disease locus, 664
Chromosome 15, human creatine kinase genes, 144
Chromosome 17, major histocompatibility complex of developmental mutants, 115 (R)
Chromosome 17p13, deletions in Miller-Dieker syndrome, 597
Chromosome 19, human creatine kinase genes, 144
Chromosome 20cen→q13.1, assignment of adrenodoxin pseudogene, 52
Chromosome Xq, proximal, ordering of DNA probes, 452
Chromosome Xq11-21.1, and hypohidrotic ectodermal dysplasia, 75
Chromosome Y, C-banded, heterochromatin, 948
Chromosome breakage, and recombination at fragile points, 265
Chromosome elimination, in micronuclei, and hypoploidy, 733
Clinical genetics, and somatic mosaicism, 355
Cloning, cystic fibrosis gene, and chromosome 7 DNA markers, 645
Coagulation factor XIII, polymorphism of A subunit, 170
COL1A2, linkage to *CYP3*, 280
Collagen
Type I alpha gene, linkage to nifedipine oxidase gene, 280
Type II, abnormal, and type II achondrogenesis-hypochondrogenesis, 904

Color vision, abnormal red-green, 675
Conditioning on subsets, and ascertainment, 364
Consanguineous marriage and reproduction, 188
Continuing-education model program, 559 (HGES)
Creatine kinase genes, human, chromosomes 15 and 19, 144
Crossover positions, and chiasma number, nonrandomness, 38
CYP3, linkage to *COL1A2*, 280
Cystic fibrosis
  IRP, recombinations, 471
  Linked DNA polymorphisms, 23
Cystic fibrosis gene, cloning, DNA markers on chromosome 7, 645
Cytogenetic studies, Dupuytren contracture, 285

Deletion(s)
  Band 17p13, Miller-Dieker syndrome, 597
  Intragenic, in DMD/BMD, 620
  Mapping, hybrid cell, localization of DNA fragments, 442
  Miller-Dieker syndrome, 587
Diabetes mellitus
  Chromosome 1 in clinical expression, 217 (L)
  Insulin-dependent
    Genetic heterogeneity, modes of inheritance, risk estimates, 799
    Model for multifactorial disorders, 793 (E)
  Type 2, and *Gm3;5,13,14*, 520
DiGeorge anomaly, cytogenetic findings, 605
Dizygosity, phenotypically concordant twins, probability, 817
DNA
  Amplified β-globin, dot-blot analysis, 95
  Haplotyping, PI Z and M alleles, 978 (L)
  Markers
    Chromosome 7, and cloning of cystic fibrosis gene, 645
    Predictive testing for Huntington disease, 689
  Polymorphism(s)
    Linked, and cystic fibrosis, 23
    Mitochondrial, 534
  Probe(s), ordering by molecular analysis, 452
  Sequences
    Calculation of paternity probability, 860
    Heterochromatin of C-banded Y chromosomes, 948
  Test for hereditary amyloidosis, 182
DNA-DNA hybridization, detection of trisomy 21, monosomy 231, and sex determination, 502
Dot-blot analysis, β-thalassemia genes, 95
Down syndrome
  Cause of death to age 30, 239
  Maternal serum alpha-fetoprotein levels, 160
  Maternal smoking, 545 (L), 546 (L)
DRβ cDNA, detection of HLA-DR RFLPs and subtypes, 954
Duplication, maternal, and gene deletion in sporadic hemophilia, 274
Dupuytren contracture, cytogenetic studies, 285
Dural ectasia, and Marfan syndrome, 726
Dystrophin cDNA, and deletions in BMD/DMD, 620
Dystrophin gene
  Deletion, and myopathy in complex glycerol kinase deficiency, 126
  Hybridization, 612

Ectasia, dural, and Marfan syndrome, 726
Ectodermal dysplasia, X-linked hypohidrotic, 75
Editorial peer review, 981 (L)
Education, professional, 549 (HGES), 551 (HGES), 552 (L)
Educational resources, book reviews, 563 (HGES), 566 (HGES), 568 (HGES), 570 (HGES)
Embryonic expression, human 40-kD keratin, 630
Emergenesis, 344 (L)
Enzymes
  Alcohol-metabolizing, genotypes, 744
  Angiotensin-converting, 774
Epilepsy, risk in offspring of epileptic parents, 257
Excision repair gene, 144

Factor XIII, coagulation, polymorphism of A subunit, 170
Fanconi anemia, cellular susceptibility to ambient oxygen, 429
Fixed-structure sampling, in complex segregation analysis, 336
*Fok*I cleavage site, in glucose-6-phosphate dehydrogenase variants A(+) and A(−), 131
Fragile site (s), chromosome breakage and recombination, 265
Fragile X
  Linkage studies, 684
  Syndrome, auditory brain-stem responses, 46
Fucosidosis, linkage to structural α-L-fucosidase gene, 749

Gene deletion, in sporadic hemophilia, 274
Gene rearrangements, and α-globin gene haplotypes, 971
Genetic discrimination, ASHG Social Issues Commit-

tee workshop, 105 (ASHG)
Genetic disease, animal models, 582 (R)
Genetic heterogeneity, insulin-dependent diabetes mellitus, 799
Genetic mapping, 21-hydroxylase locus, 304
Genetic polymorphism, paraoxonase/arylesterase, 230
Genetic screening, and public health, 344 (L)
Genetic variation, 709
Genotypes, alcohol-metabolizing enzymes, 744
Glucose-6-phosphate dehydrogenase, variants A(+) and A(−), 131
Glycerol kinase deficiency, complex, myopathy, 126
Glycoprotein, β1, human pregnancy-specific, 152
Gm typing, by immunoglobulin heavy-chain gene RFLP analysis, 175
Gm3;5,13,14, and type 2 diabetes mellitus, 520
Growth factor II, human insulin/insulin-like, 495
Gyrate atrophy, choroid and retina, 922, 929

H21-hydroxylase locus, genetic mapping, 304
Haplotype(s)/haplotyping
  α-Globin gene, 971
    Cluster, 527
  DNA, PI Z and M alleles, 978 (L)
  ORMI locus, 165
  RFLP, phenylalanine hydroxylase locus, 781 (L)
Hemophilia, sporadic, gene deletion, 274
Hermaphroditism, XX true, 4
Heterochromatin, C-banded Y chromosomes, 948
Heterogeneity, phenylalanine hydroxylase deficiencies, 914
High-density lipoprotein, pedigree analysis in baboons, 401
Hiroshima and Nagasaki, protein variants, 870
HLA antigens, in cardiomyopathic chagasics, 770
HLA-DR typing, RFLPs and subtypes, 954
Homocysteinemia, intermediate, 414
Huntington disease
  Age at onset, 695
  Predictive testing with linked DNA markers, 689
Hybridization
  DNA-DNA, detection of trisomy 21 and monosomy 21, and sex determination, 502
  Dystrophin gene, 612
Hypercholesterolemia, familial, and low-density-lipoprotein receptor gene, 60
Hypertension, and sodium-lithium countertransport, 14
Hypervariable marker, human α-globin gene cluster, 249
Hypochondrogenesis-achondrogenesis, type II, 894
  Abnormal type collagen, 904
Hypohosphatemia, X-linked, in mice, 293
Hypoploidy, and chromosome elimination in micronuclei, 733

Immunoglobulin heavy-chain gene RFLP analysis, and Gm typing, 175
Inheritance
  Insulin-dependent diabetes mellitus, 799
  Low-density lipoprotein subclass patterns, 838
  Major-locus, and hypertension and sodium-lithium countertransport, 14
Insecticide metabolites, hydrolysis, 230
IRP, and cystic fibrosis, recombinations, 471
Isoelectric focusing, in orosomucoid typing, 165

Journal scope, 219 (L)

Keratin, human 40-kD, embryonic expression, 630

Linkage and sex-specific recombination rates, 396
Linkage analysis
  Localization of X-linked hypohidrotic ectodermal dysplasia, 75
  Segregation analysis, regressive models, 29
  X-linked retinitis pigmentosa gene, 484
Linkage disequilibrium
  Cystic fibrosis and linked DNA polymorphisms, 23
  Insulin/insulin-like growth factor II, 495
Linkage map, short arm of human chromosome 1, 462
Linkage relationships, X-linked retinoschisis locus, 476
Linkage studies, fragile X, 684
Liver disease, alcoholic, 744
Loci, methods of ordering, 964
Low-density-lipoprotein
  Receptor gene, and familial hypercholesterolemia, 60
  Subclass patterns, inheritance, 838

M allele, DNA haplotyping, 978 (L)
Major histocompatibility complex, in developmental mutants, 115 (R)
Major-locus inheritance, and hypertension and sodium-lithium countertransport, 14
Mapping
  Human genome, ASHG proposed position, 101 (ASHG)
  Hybrid cell deletion, 442
  21-Hydroxylase locus, 304
Marfan syndrome, and dural ectasia, 726
Maternal duplication, and gene deletion in sporadic hemophilia, 274

Metabolism, vitamin D, in hypophosphatemic mice, 293
Methylenetetrahydrofolate reductase, 414
Miller-Dieker syndrome
  Deletions, 587
    Band 17p13, 597
Mitochondrial DNA, polymorphism(s), 134, 534
Mitochondrial import, human prebranched chain acyltransferase, 764
Mitochondrial RNA structure, in hereditary orotic aciduria fibroblasts, 86
Molecular analysis, ordering of DNA probes on proximal Xq, 452
Monosomy 21
  De novo t(p5:21q), 511
  Detection by DNA-DNA hybridization, 502
Multifactorial disorders, insulin-dependent diabetes mellitus as model, 793 (E)
Multilocus recombination, nonrandomness in chiasma number and crossover positions, 38
Mutation(s)
  Fanconi anemia, 429
  Meiotic and mitotic origins, in DMD/BMD, 620
Myopathy, in complex glycerol kinase deficiency, 26

Nagasaki and Hiroshima, protein variants, 870
Negligible effects, cumulation, 346 (L)
Neural tube defects, 827
Nifedipine oxidase gene, linkage *COL1A2*, 280

Ornithine aminotransferase structural gene, and gyrate atrophy, 922
Ornithine ketoacid transaminase, and pyridoxine, 929
Orosomucoid typing, by isoelectric focusing, 165
Orotic aciduria fibroblasts, hereditary, UMP synthase gene and mRNA structure, 86

P450PCN1 gene, linkage to *COL1A2*, 280
Paraoxon, hydrolysis, 230
Paraoxonase/arylesterase
  Genetic polymorphism, 230
    Human serum, 227 (E)
Paternity probability, 860
  Methods of calculating, 197
Pedigree(s)
  Ascertainment sampling, 387
  Sequential and fixed-structure sampling, 336
Pedigree analysis, HDL in baboons, 401
Peer review, editorial, 981 (L)
Phenylalanine hydroxylase
  Deficiencies, heterogeneity, 914
  Locus, RFLP haplotypes, 781 (L)
Phosphate transport, in hypophosphatemic mice, 293
PI Z Allele, DNA haplotyping, 978 (L)
Polygenes, versus one gene plus chance, 783 (L)
Polymorphism(s)
  Apolipoprotein, population distribution, 847
  Dystrophin gene hybridization, 612
  Linked DNA, and cystic fibrosis, 23
  mDNA, 134, 534
  Paraoxonase/arylesterase, human serum, 227 (E)
  Restriction-fragment-length
    *Eco*RI, and SP-C gene, 436
    HLA-DR, 954
    Immunoglobulin heavy-chain gene analysis, 175
    Phenylalanine hydroxylase locus, 781 (L)
  Subunit A of coagulation factor XIII, 170
Polyposis, familial adenomatous, and chromosome 5, 638
Population amalgamation, 709
Predictive testing, Huntington disease, linked DNA markers, 689
Prenatal diagnosis, X-linked hypohidrotic ectodermal dysplasia, 75
Prenatal screening, 979 (L), 980 (L)
Probability, paternity, 860
  Methods of calculating, 197
Prophase chromosomes, analysis with unique-band sequences, 934
Protein variants, Hiroshima and Nagasaki, 870
Pseudogene, adrenodoxin, assignment to 20 cen→q13.1, 52
Pseudogene sequence, and embryonic expression of human keratin, 630
Pyridoxine, and ornithine ketoacid transaminase, 929

Quantitative trait, truncation, and single ascertainment, 705

Receptor gene, low-density-lipoprotein, 60
Recombination
  Fragile sites, and chromosome breakage, 265
  IRP and cystic fibrosis, 471
  Multilocus, nonrandomness in chiasma number and crossover positions, 38
Recombination frequency/rate
  Mapping of 21-hydroxylase locus, 304
  Sex-specific, and linkage, 396
Red-green color vision, abnormal, 675
Renal epithelial cells, in X-linked hypophosphatemic mice, 293
Restriction analysis, structural α-L-fucosidase gene, 749

Restriction-fragment-length polymorphism
*Eco*RI, and SP-C gene, 436
HLA-DR, 954
Immunoglobulin heavy-chain gene analysis, 175
Phenylalanine hydroxylase locus, 781 (L)
Restriction-fragment patterns, dystrophin gene hybridization, 612
Retina, gyrate atrophy, 922, 929
Retinitis pigmentosa, X-linked recessive, gene localization, 484
Retinoschisis, X-linked, linkage relationships, 476
Risk estimates, insulin-dependent diabetes mellitus, 799

Screening, prenatal, 979 (L), 980 (L)
Segregation analysis
Inheritance of low-density lipoprotein subclass patterns, 838
Linkage analysis, regressive models, 29
Sequential and fixed-structure sampling, 336
Seizures, risk in offspring of epileptic parents, 257
Sequencing, human genome, ASHG proposed position, 101 (ASHG)
Sequential sampling, in complex segregation analysis, 336
Sex determination, 1 (E)
DNA-DNA hybridization, 502
Sex-specific recombination rates, and linkage, 396
Sexual differentiation, primary, and XX true hermaphroditism, 4
Single ascertainment, and truncation for quantitative trait, 705
Smoking, maternal, and Down syndrome, 545 (L), 546 (L)
Social Issues Committee, ASHG
1987 report, 103
Workshop on genetic discrimination (ASHG), 105
Sodium-lithium countertransport, and hypertension, 14
Somatic mosaicism, and clinical genetics, 355
Surfactant protein SP-C, hydrophobic, 436

t-Complex, mouse, 115 (R)
t(5p;21q), de novo, molecular and cytogenetic characterization, 511
Tourette syndrome, and neuropsychiatric disorders, 206 (L), 209 (L)
Trisomy 21, detection by DNA-DNA hybridization, 502
Twins, phenotypically concordant, probability of dizygosity, 817

UMP synthase gene, in hereditary orotic aciduria fibroblasts, 86
Unique-band sequences, analysis of prophase chromosomes, 934

Vitamin D metabolism, in hypophosphatemic mice, 293
Vitiligo, genetical model, 119
VNTR markers, isolation, 854

Wilson disease locus, 13q14-q21, 664

X-linked hypohidrotic ectodermal dysplasia, 75
X-linked hypophosphatemia, in mice, 293
X-linked recessive retinitis pigmentosa, gene localization, 484
X-linked retinoschisis locus, linkage relationships, 476
X-linked sideroblastic anemia, and 5-aminolevulinate synthase, 331
XX true hermaphroditism, 4

Y chromosomes, C-banded, heterochromatin, 948
